

During the Autumn and Spring Terms, class teachers will be helping the children to develop their number sense of 'number bonds'.

Number bonds are pairs of numbers that can be added together to make another number e.g. $3 + 2 = 5$

A lot of practical activities will take place each Friday during these first two terms to help the children understand number bonds.

It would be very beneficial for your child if you could practice these at home on a regular basis.

If you are able to, please download the
FREE MATHS APP : '1-minute maths'

This is in line with our maths scheme we use in school 'White Rose' and you will be able to access material for number bonds, which includes visual 'hints' such as ten frames to help the children.

e.g. This pictorial image shows $7 + 3 = 10$
(We use two different colours of counters when showing two numbers being added together)

Autumn 1 and 2

In the Autumn Term, children will be learning their **number bonds within 10 and to 10.**

$0+10=10$

$4+6=10$

$8+2=10$

$1+9=10$

$5+5=10$

$9+1=10$

$2+8=10$

$6+4=10$

$10+0=10$

$3+7=10$

$7+3=10$

Spring 1 and 2

In the Spring Term, children will be learning their **number bonds within 20 and to 20.**

	$1 + 19$		$19 + 1$
	$2 + 18$		$18 + 2$
	$3 + 17$		$17 + 3$
	$4 + 16$		$16 + 4$
	$5 + 15$		$15 + 5$
	$6 + 14$		$14 + 6$
	$7 + 13$		$13 + 7$
	$8 + 12$		$12 + 8$
	$9 + 11$		$11 + 9$
	$10 + 10$		$10 + 10$
